Hack Athena

An anonymous narcotic incident related reporting platform. Here the public can report a narcotic incident like sale of narcotics or the presence of peddlers on this website. These tips are put as posts on the platform and it is visible to everyone. People can upvote or downvote a post if it's real or not and thus ensuring it's not fake information. The authorities can also monitor through this platform and ensure action is taken whenever an incident like this is reported. The location of the incident can also be added and filtered for various locations.

Using this platform authorities can increase monitoring certain areas which have a lot of narcotic activities and stop such activities. Through this platform one can also report drug incidents happening in one's educational institutions etc..

Features

- Anonymous reporting for anyone. A user need not be worried about his or her identity while reporting in this website. The identity of the user is protected as only the public address of the user is visible in the website. A user can create a profile for posting such incidents.

- Upvoting or downvoting a tip posted in the website. This information is publicly available to all the people and they can validate these tips and thus ensuring it is not a fake one.

- Location can also be added while posting the information. One can filter the location according to their location.

- To ensure fake information is not put on the website one also has to upload a supporting file that shows such a narcotic incident happened. It can be a video audio clipping or an image which only adds to the genuinity of the information posted by the user.
